*Four main zigzag groove design provides excellent drainage performance and improves grip on mix road conditions;

*Large tread pattern block design ensures optimized tire contact area and provides outstanding dry and wet handling performance;

*The wave shape groove design, improves the stability performance in all seasons condition; *Optimized arrangement of the variegated pattern design, reduced the tire noise;

*Enhanced tire sidewall provides more protection for safe driving.

*With ultimate tread block rigidity which maximizes traction in a variety of highway conditions and improves overall handling performance.

*Improves tread block rigidity, optimizing handling performance and ride quality. *In combination with optimized sipes, the high-stability center rib enhances steering, handling, and braking performance.

*Block edge steps, open shoulders, and stone ejectors deliver excellent off-road traction while maintaining both wet and dry on-road performance.

*Continuous shoulder zig-zag grooves and center x-shaped grooves improve evacuation of rain, mud, and snow and overall handling in all weather conditions.

*Shoulder block design extends from tread shoulder block to sidewall, protecting against sharp rocks and providing additional off-road and off-camber traction.

*The outside blocks are designed for extended wear with an aggressive look. *Designed with an optimized void ratio to allow for a high surface area, improving mud traction and promoting long, even tread wear, while effectively cleaning out rocks in off-road conditions.

*Advanced engineering of the shoulder and sidewall design details give the tire uniformity and control stability.
